1. COMPANY OVERVIEW

AidenAI at a Glance

AidenAI is an **AI-Builder Company** — designing secure, scalable, enterprise-grade AI solutions that drive industry impact. Founded and led by **Srinivas (Srini) Kamadi**, a proven leader in driving digital transformation for Fortune 500 enterprises, AidenAI embeds agentic intelligence across Business, Technology, and Operations. The company operates globally with dual headquarters in the USA and India.

Mission & Positioning

AidenAI's mission is to enable enterprises to transition from traditional systems to **AI-powered, self-evolving platforms** that drive efficiency, innovation, and sustained competitive advantage. The company specializes in applying **Agentic AI, intelligent automation, and data-driven insights** to modernize legacy ecosystems, enhance enterprise agility, and unlock new sources of growth.

Recognized by **Everest Group's PEAK Matrix® 2025** and **HFS Hot Tech Vendor 2025**, AidenAI has rapidly established itself as an "Incredible Challenger brand" in the enterprise AI and digital transformation landscape.

2. LEADERSHIP & ORGANIZATIONAL STRUCTURE

Founder & CEO

Srinivas Kamadi is the Founder and CEO of AidenAI. A proven industry leader with deep expertise in strategy, sales, and next-generation technology, he has driven transformation for Fortune 500 enterprises. He leads AidenAI in helping organizations modernize legacy systems, eliminate technical debt, and build secure, scalable, AI-driven platforms. Recognized as a thought leader in artificial intelligence.

Executive Leadership Team

Srinivas Kamadi Founder & CEO	Kiran V Chief Operating Officer	Augustine Hermann Global Head – Data & Digital
Suman Mishra Head – Enterprise Sales	Tanmay Dey Head – AI Practice	Venkat Paparao Global Delivery Head
Prasanna GR Global Head – Finance & Operations	Malay Baral CTO – Products & Platforms	

Senior Leadership

Kalyan S Portfolio Head	John Lordo Director – Technology & Architecture	Harishankar Sharma Head – Business Consulting
Neeta K Director – Enterprise Services	Srikanth G Director – AI & Innovation	Peter Donohue Director – Engineering
Vaishno M Head – COE	Malvika Dalvi India HR Head	Suyash Sukhwal Director – Sales
Vinoth Jayaraman Director – Products & Platforms	Vishal Khajuria Director – Program Management	Sreevalli Sista Director – Program Management
William Leong Senior Manager – Program Management	Jaslin Jaison Director – Sales	Ramesh Billapati Director – Technology & Architecture
Lindsay Guzik Engineering Lead	Tharun Murkuri Director – Program Management	Srinivasa Babu M Director – Program Management
Samir Patel Senior Director – Engineering	Sumana S Bhat Senior Director – Engineering	Rakesh R Patel Director – Program Management
Amita Panigrahi Senior Manager – Program Management	David Goodman Senior UX Engineer	Anika Gulati HR Manager
Saugato Saha Director – Technology & Architecture	Shyam Chandran Director – Program Management	Santosh Bhuyan Senior Manager – Program Management
Veneela Adusumalli Senior Manager – Program Management		

3. CORE VALUES, CULTURE & EMPLOYER PHILOSOPHY

AidenAI goes beyond the brief to nurture a culture of **trust, empowerment, and respect**. The company believes that AI is truly an instrument for human amplification and builds teams that believe in — and benefit from — human-AI collaboration based on a foundation of lifelong learning.

People–Powered	The expert team combines human insight with AI capabilities to deliver exceptional results. People are the most important asset at AidenAI.
Results–Focused	AidenAI prioritizes time-to-value and measurable outcomes in every client engagement. Every solution is built to deliver value from day one.
Excellence–Driven	Committed to delivering enterprise-grade solutions with the highest quality standards. 100% client satisfaction is a stated organizational goal.

Talent Acquisition Philosophy

AidenAI actively recruits professionals with expertise in AI, machine learning, agentic architectures, data engineering, software development, program management, enterprise sales, and digital transformation. The company has a dedicated talent acquisition team led at the senior executive level (Anunaya Talla, Senior Executive – Talent Acquisition).

Open positions and applications are managed through the official careers portal at careers.aidenai.com. The India HR function is headed by **Malvika Dalvi** (India HR Head) with **Anika Gulati** as HR Manager.

4. PRODUCTS, PLATFORMS & TECHNOLOGY OFFERINGS

AidenAI structures its offerings across three pillars: **AI For Business**, **AI For Tech**, and **AI For Operations**. The company has built 100+ agentic solutions delivered through its flagship Digital Acceleration Platform.

AiDAP – Digital Acceleration Platform

AiDAP (Aiden Digital Acceleration Platform) is AidenAI's flagship modern agentic platform that accelerates digital transformation, development, automation, and testing across the enterprise ecosystem. AiDAP 2.0 — the current version — is live and focuses on tech debt reduction and legacy modernization.

IndX	Agentic Industry Accelerators Lightweight, pre-configured industry apps powered by agentic intelligence for rapid enterprise adoption. Covers underwriting workbenches, claims management, wealth platforms.
Tech D	Technology Displacement Platform Enables enterprises to migrate from any legacy technology to any modern platform using agentic orchestration. Four AI agents orchestrate: Discover, Displace, Deploy, Test — automating analysis, conversion, testing and deployment.
HX	Human Experience Platform Reimagines human experience through agentic, AI-driven design. Covers Figma-to-App, Excel-to-App, conversational interfaces, and intelligent case management.
TX	Agentic Test Workbench Uses intelligent agents to analyze code and documentation, generating comprehensive test cases and automation scripts that accelerate testing and improve coverage.
FAB	Agentic Integration Fabric Integration FABRIC Agents create connected infrastructure by managing the journey across systems, extending value across the enterprise fabric using AI bots, data, and message queue design.
OPS	AI Ops Intelligent operations and advanced monitoring agents enhance platform reliability via observability, resilience, diagnostics, alert notifications, monitoring, and auditing.

Enterprise AI Builder Services

Enterprise AI Agent Builder Capabilities: Multi-agent orchestration RAG, Vector Search, Domain Ontologies Conversational, Workflow & Decision Agents Enterprise-grade security & adapters Cross-domain AI decision support Outcomes: 70–90% manual workload reduction 2–6 week deployment time 30–50% productivity uplift
AI Consulting & Advisory Capabilities: AI CoE setup AI Governance & Ethics Transparency and Security Agentic Architecture design Cost-effective AI strategy Outcomes: 99% implementation success rate 25–40% reduction in cost per AI deployment 100% model governance compliance

Data & Engineering Services

Capabilities: Data extraction, cleansing & enrichment | Data lake & warehouse engineering | Forecasting, ML models, analytics | Real-time decision dashboards | Multi-cloud platforms (Azure, AWS, GCP)

Outcomes: 10× faster data onboarding | 25–50% operating cost reduction

5. INDUSTRY SOLUTIONS & AGENTIC CAPABILITIES

AidenAI delivers industry-calibrated AI agents that reason across structured and unstructured data, operate within regulatory guardrails, and execute with goal-oriented precision.

Insurance Solutions

- Submission Hub – End-to-end intelligent automation platform using multi-agent AI for document extraction, enrichment, and contextual analysis. Integrates LLM-driven risk evaluation, conversational triage, and workflow automation.
- Underwriting Workbench – Streamlines and enhances the underwriting process for commercial insurance with integrated intake, data enrichment, and decisioning.
- Claims Workbench – AI-powered claims automation and processing.
- Broker Solution – Dedicated broker-facing agentic tools.
- Policy Administration – Full lifecycle policy management.
- Risk & Compliance – Regulatory guardrails and compliance automation.
- Marine Cargo – Comprehensive underwriting with end-to-end integration.
- Auto Insurance (Mobile) – Mobile-first application (GeneraliXFIAT) for vehicle insurance.
- Commercial Trucking – Volvo Auto-Mobile Insurance for commercial fleets.

Financial Services Solutions

- Client Onboarding – Consolidated onboarding solution covering digital due diligence.
- Wealth & Investment Management – AI-powered portfolio intelligence and client advisory.
- Digital Broking – Intelligent digital brokerage platform.
- Fund Disclosure Application – Modern intake-to-selection process for mutual fund carriers.

Talent Acquisition Suite

- Talent Success Hub – Advanced people-solutions using Small LLMs, agentic MCP architectures, multi-agent orchestration, enterprise knowledge graphs, and predictive ML models. Models human skills, behavior, potential, and workforce patterns at scale.
- Workforce Optimization Suite – AI-driven workforce analytics and optimization.
- Talent Transformation Hub – End-to-end talent lifecycle transformation.

UnqorkAI Practice

AidenAI is the **preferred partner for Unqork**, working directly with Unqork Digital on customer engagements. The UnqorkAI practice combines Unqork's codeless platform with agentic AI to deliver industry-specific solutions at exceptional speed, accelerate time-to-value, and eliminate technical debt. AidenAI's developers consistently achieve **60 story points per developer per sprint** — up to 10× faster than traditional development.

6. DATA & INSIGHTS SERVICES

AidenAI's Data Services practice offers a comprehensive suite of solutions addressing every stage of the data journey, from foundational strategy to advanced analytical insights. AI and machine learning are embedded at the core of every engagement.

Data Strategy & Governance	Data roadmap, Governance Framework, Data Quality Management, maturity assessment, regulatory compliance (GDPR/CCPA). Establishes policies, roles, and processes for managing access, privacy, lineage, and compliance.
Data Engineering & Architecture	Data Pipeline Development, Data Warehouse/Lake Design, ETL/ELT, cloud migration (AWS, Azure, GCP), Real-Time Data Streaming. Builds robust pipelines ensuring reliability, performance, and adaptability.
Data Management	Master Data Management, Metadata Management, Data Quality Assurance, Security & Compliance. Creates a single, consistent, and accurate view of critical business data across the enterprise.
Business Intelligence & Visualization	Interactive dashboards, Self-Service BI, Operational Reporting, Data Visualization & Storytelling. Transforms complex data into clear, actionable insights using Tableau, Power BI, and Qlik.
Advanced Analytics & AI	Predictive Analytics, GenAI, ML Models, NLP, Prescriptive Analytics. Uncovers hidden patterns, predicts outcomes, and automates decision-making with measurable business impact.

Team Certifications & Strength

Role	Count	Certifications / Expertise
Data Engineers	75+	Azure, AWS, GCP certified specialists
BI & Analytics Consultants	50+	Tableau, Power BI, Qlik expertise
Data Scientists	60+	AI/ML expertise, advanced analytics
Platform Certifications	—	Snowflake, Databricks, Microsoft, AWS, Google Cloud

7. DIGITAL TRANSFORMATION SERVICES

AidenAI's Digital Services practice delivers a holistic suite of offerings empowering organizations to thrive in the digital era — from strategic consulting to advanced platform engineering.

Consulting & Advisory Services

- Cloud-Native Strategy & Architecture – Designing scalable cloud infrastructures, containerization, and microservices architectures.
- Low-Code/No-Code Platform Advisory – Empowering citizen developers, rapid prototyping, and quick deployment without extensive coding.
- API-First Integration Strategy – Building robust API-first frameworks for seamless ecosystem connectivity and efficient data orchestration.
- Legacy Modernization Roadmaps – Phased migration strategies upgrading technology stacks and transforming legacy systems into modern, efficient platforms.

Technology Modernization

- Low-Code/No-Code (LCNC) Development – Reduces time-to-market by up to 50%, automates cross-functional workflows, creates audit trails, and ensures compliance.
- Ecosystem Connectivity – Robust API strategies for seamless data connectivity. Partners with Boomi and Workato; migrates clients from TIBCO, IIB, OpenText.
- Custom Digital Services – Scalable, secure applications using React, Angular, Java, and Python. Builds next-generation portals, agent/provider tools, and mobile experiences.

Proven Digital Transformation Results

40%	60%	300%	99.9%
Faster Time-to-Market	Cost Optimization	ROI Acceleration	System Reliability

8. CLIENT CASE STUDIES & SUCCESS STORIES

The following case studies represent AidenAI's delivered outcomes across Insurance, Financial Services, and AI/Automation domains.

INSURANCE — Rate-Quote-Bind with UW Workbench

Challenge: A top-20 P&C; carrier needed to reimagine its Excel-based Rate, Quote, Bind system to lower cost and complexity while increasing speed to market. Key issues: technology complexity, excess variability, operational overhead, difficulty scaling.

Solution: Used Unqork to build an end-to-end digital solution for 8 specialty products covering Submission, Ratings, Quote/Bind, Task Management, Renewals, Referrals, Dashboard, and SSO Security.

Key Metrics: 14+ weeks to market | 80%+ reduction in delivery timelines | 83%+ increase in quote-to-bind ratio

ARTIFICIAL INTELLIGENCE — Touchless Recruitment

Challenge: A global talent solutions firm needed to enable touchless recruitment, improve operational efficiency, create new revenue streams, and elevate candidate and customer experience.

Solution: Built an AI-powered SaaS platform deploying 20+ agents — achieving fully touchless recruitment lifecycle automation.

Key Metrics: 50% faster recruitment cycles | +25% SLA improvement

FINANCIAL SERVICES — Client Onboarding – Financial Services

Challenge: Enterprise client needed a consolidated solution for all onboarding needs with digitized due diligence and reduced operational risk.

Solution: Delivered Unqork-powered consolidated onboarding for a global investment bank, covering all onboarding needs in 18 weeks.

Key Metrics: 18-week delivery for a global investment bank | Reduced operational risk

INSURANCE — Fund Disclosure Application

Challenge: A top Mutual Fund Carrier needed a modern intake-to-selection process with customized email delivery.

Solution: Built modern intake-to-selection process with customized email delivery functionality.

Key Metrics: 14-week delivery | Modern digital intake platform

ARTIFICIAL INTELLIGENCE — EDI Modernization

Challenge: A global manufacturing leader needed to migrate hundreds of EDI interfaces from outdated OpenText platform to a modern cloud-native platform.

Solution: Used AiDAP agentic platform to enable migration to Boomi — migrating 4,000+ EDI interfaces.

Key Metrics: 50% faster migration | 40% cheaper than traditional approach

INSURANCE — Auto Rate-Quote-Bind (Canada)

Challenge: A top-5 P&C; carrier in Canada needed a modern Rate Quote Bind process.

Solution: Built modern Rate Quote Bind system leveraging the Unqork Integration Framework (UIF).

Key Metrics: Modern RQB platform deployed for major Canadian carrier

INSURANCE — Specialty Transformation

Challenge: Client needed to digitize intake, flow, and analysis workflows while enhancing underwriter and agent communication.

Solution: Digitized end-to-end specialty workflows, streamlining underwriting communication and analysis.

Key Metrics: Fully digitized specialty underwriting workflow

INSURANCE — Digitized Portals

Challenge: A Global Commercial Lines Carrier needed to increase profitability through digitizing policy lifecycle management.

Solution: Digitized full policy lifecycle management including portals for agents, brokers, and policyholders.

Key Metrics: Increased profitability through full policy lifecycle digitization

9. PARTNER ECOSYSTEM & RECOGNITIONS

Technology & Platform Partners

- Unqork (Preferred Partner – Codeless platform)
- Accenture (Global System Integrator)
- NTT Data (Global System Integrator)
- Deloitte (Global System Integrator)
- HCL (Global System Integrator)
- Virtusa (Technology Partner)
- Boomi (Integration Platform)
- Workato (Integration Platform)
- Microsoft Azure (Cloud)
- Amazon Web Services (Cloud)
- Google Cloud Platform (Cloud)
- Snowflake (Data Platform)
- Databricks (Data & AI Platform)

Industry Recognitions

HFS Hot Tech Vendor 2025 (June 2025)	<i>"The line between services and software is blurring, and in the future, services will increasingly be delivered as scalable software and agentic solutions."</i>

Customer Testimonials

"Change management is hard — and for us, the challenge was winning the hearts and minds of our users. Partnering with AidenAI helped us overcome that. Together, we delivered the functionality our users were looking for and gained their confidence."

— Bryan Brizzi, CDO, Crum & Forster

"AidenAI's team recently hit 60 story points per Unqork developer per sprint — up to 10x faster than traditional development. The result: faster builds, easier maintenance, stronger security — and true balance of speed, quality, and cost."

— Gary Hoberman, Founder and CEO, Unqork

"One of the biggest challenges with adopting a new platform is that, even with an in-house team, not many people are familiar with it. That's where partnering with AidenAI made all the difference — your team really helped us."

— Sheetal Vyas, AVP Engineering, Co-Operators

10. COMPANY POLICIES, LEGAL & COMPLIANCE

The following policies govern AidenAI's operations, use of its platforms, and data handling practices. Recruiters and employees should be familiar with these frameworks.

Data Privacy Policy

Scope & Applicability

AidenAI's privacy policy governs the collection, use, storage, and protection of personal data across all AidenAI platforms and services. By using or accessing AidenAI's services, users acknowledge they have the right and authority to accept the Privacy Policy, have read and understood it, and consent to the policies and practices outlined.

Data Collected

- **Account Information:** Full name, contact details, login credentials, birthdate, payment methods, and transaction records when creating an account.
- **Communication Information:** Name, contact information, and message content when contacting AidenAI via email or social media.
- **Usage Data:** Types of content viewed, features used, actions taken, country, time zone, access dates/times, device type, and connection information.
- **Cookies & Similar Technologies:** Used to ensure services function properly and enhance user experience. May save certain data between sessions even without an account.
- **Third-Party Sources:** Information received from trusted partners to help detect and prevent fraudulent activities, service abuse, and security risks.

Data Sharing

AidenAI may share data: (a) when necessary to prevent harm; (b) to enforce agreements and policies including Terms of Service; (c) to detect, prevent, and investigate fraudulent or unauthorized activities; (d) in connection with business transfers, mergers, or acquisitions; (e) with affiliates and subsidiaries strictly for providing services; (f) with explicit user consent.

IMPORTANT: AidenAI does not and will never sell personal information, including Google user data, to third parties under any circumstances. AidenAI does not disclose personal information to third parties for their direct marketing purposes without explicit consent.

Terms of Service

Applicability

AidenAI's Terms of Service apply to all users of AidenAI products, including individual users and entity clients. These terms, together with the Privacy Policy and any written Order Forms, constitute the single binding agreement between users and AidenAI.

Account Requirements

To access and use AidenAI's services, users must create an AidenAI user account and provide true, accurate information. Terms may be updated periodically, and continued use of services constitutes acceptance of updated terms.

License Grant

Users grant AidenAI and affiliates a non-exclusive, transferable, worldwide, fully-paid, royalty-free, perpetual, irrevocable, sublicensable license to use, copy, reproduce, modify, adapt, prepare derivative works from, translate,

distribute, publicly perform, and publicly display User Content for the purposes of: (1) providing services; (2) maintaining and optimizing platform performance; (3) improving AI model accuracy and capabilities; and (4) developing new features.

Intellectual Property

AidenAI's Terms of Service do not transfer any ownership of AidenAI IP to users. Services are provided on a limited-access basis, and no rights are granted except as explicitly set forth. Third-party company names, logos, and marks remain the property of their respective owners.

Usage Data Rights

Users authorize AidenAI and its third-party service providers to generate and use statistical data, logs, insights, usage metrics, and other aggregated operational data for analytics, performance optimization, and service improvement in accordance with applicable laws and the Privacy Policy.

Prohibited Content & Uses

- Illegal, harmful, hateful, sexually explicit, discriminatory, or violent content
- Content involving sexual exploitation, child abuse, or harassment
- Content promoting terrorism, privacy violations, or illegal activity
- Content that circumvents content standards or applicable law
- Fraudulent, unauthorized, or otherwise abusive use of the platform

Violations may result in account suspension, content removal, or referral to law enforcement. AidenAI uses automated filters and human reviewers to detect and address violations.

Moderation & Enforcement

AidenAI uses automated filters and human reviewers to detect and address violations. Users agree to cooperate with moderation inquiries and respond honestly to requests for clarification. Failure to cooperate or providing misleading information may result in restrictions or account termination.

Data Governance & Compliance Framework

As a data services provider, AidenAI implements comprehensive governance frameworks for its clients and internally:

- GDPR/CCPA Compliance – Privacy regulations compliance for sensitive data handling and auditability.
- Data Governance Framework – Policies, roles, and processes for managing access, privacy, lineage, and compliance across all systems.
- Data Quality Management – Standards, monitoring, and remediation to ensure accuracy, completeness, and consistency.
- Security & Compliance – Stringent access controls and adherence to evolving regulatory requirements.
- AI Governance & Ethics – Established AI CoE practices covering ethics, transparency, and security.
- Model Governance – 100% model governance compliance maintained across AI deployments.
- Penetration Testing – Periodic and disciplined penetration and static code testing to identify and mitigate risks and threats.
- Single Sign-On – Customized views and role-based access managed via AD Groups with defined provisioning and deprovisioning processes.

IP & Licensing Notice

All AidenAI platform names, product names, logos, and marks are proprietary to AidenAI. The AiDAP platform, AidenAI Agent Builder, IndX, TechD, HX, TX, FAB, OPS, and all associated intellectual property are owned by AIDEN AI Inc. and Aiden AI Pvt Ltd. No rights are granted to any of the foregoing by implication, estoppel, or otherwise except as explicitly licensed.
